

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A wind power installation comprising:
a pylon having a head;
a winch;
at least one deflection ~~roller; and roller; and~~
at least one cable passage means in the region of the pylon head for passing therethrough a hauling cable from the winch, wherein the winch is mounted on a vehicle outside the pylon at the base of the wind power installation. ~~installation on a vehicle.~~
2. (Previously Presented) A wind power installation as set forth in claim 1, further comprising a pod wherein the cable passage means is in the pod and is configured for passing through the hauling cable from the winch at a base of the wind power installation.
3. (Previously Presented) A wind power installation as set forth in claim 1, further comprising a holding arrangement fixedly connected to a foundation, for an additional winch.
4. (Currently Amended) A wind power installation as set forth in claim 1, further comprising a second cable passage means disposed above the pylon head and configured ~~to raise and lower~~ facilitate raising and lowering components of the wind power installation within the pylon.

5. (Currently Amended) A wind power installation as set forth in claim 1 wherein the ~~winch-vehicle~~ is arranged at a base of the wind power installation so that the winch is within the pylon of the wind power installation.

6. (Currently Amended) A method of fitting/removing components of a wind power installation comprising:

transporting a winch mounted on a transport vehicle to a base of the wind power installation,

laying a hauling cable ~~from~~ from the winch to at least one deflection roller in a region of a pylon head and further to a component to be fitted/removed,

attaching the hauling cable to the component, and

releasing and letting down or pulling up and fixing the component.

7. (Previously Presented) A method as set forth in claim 6 further comprising placing a second winch at the base of the wind power installation.

8. (Currently Amended) A wind power installation, comprising:

a pylon;

a base;

a pod; and

means for moving an object with respect to the pod, wherein the means for moving an object with respect to the pod is at least partially contained within the ~~pod~~. pod and includes a winch mounted on a transport vehicle.

9. (Currently Amended) The wind power installation of claim 8, wherein the means for moving an object with respect to the pod comprises:

a winch;

a cable guide in the pod;

an opening in the pod; and

a cable coupled to the winch, wherein the cable guide is configured to guide the cable and the cable is configured to pass through the opening in the pod.

10. (Canceled)

11. (Currently Amended) The wind power installation of claim 9 wherein the means for moving an object with respect to the pod further comprises:

a second opening in the pod and wherein the ~~winch is located outside the pod and the cable~~ is configured to pass through the second opening in the pod.

12.-14. (Canceled)

15. (Previously Presented) The wind power installation of claim 9 wherein the opening in the pod is in a hub of the pod.

16. (Previously Presented) The wind power installation of claim 9 wherein the opening in the pod is a blade mount opening.

17. (Previously Presented) The wind power installation of claim 9 wherein the cable guide comprises:

a deflection roller configured to support the cable.

18. (Previously Presented) The wind power installation of claim 9 wherein the means for moving an object with respect to the pod further comprises:

a second cable guide; and

a second opening in the pod.
